

The New Heta Inspire 45
4.9kW Multifuel Stove

New

The **Heta Inspire 45** is a new clean burn stove designed with a nominal output of 4.9kW and can be used for wood burning or multifuel use when burning smokeless fuel. The Inspire 45 is fitted with a cast iron door with a large view of the fire through the landscape window, separate ashpan compartment, riddling grate, vermiculite lined fire chamber, tertiary air for clean burn performance, secondary air wash to keep the door glass spotlessly clean, single lever air control allowing easy and precise control of the fire and is fitted with fresh air supply to allow the stove to be installed directly to an outside air supply; perfect for installation into highly insulated homes.

 **Made in Denmark**

The **Heta Inspire 45** is a high quality Danish engineered stove, offering outstanding levels of performance with its clean burn firebox offering 84% efficiency, precise air control and a lovely modern clean design.

Approved to EN13240 and has been recommended by Defra for use in smoke control areas.
